

# Eagle SMF

Tyre and Automotive Equipment

## HAWEKA AIRGO LIFT

Designed to lift & settle wheels on the wheel balancer.

The Airgolift allows you to achieve the best possible positioning of the tyre on the wheel balancer shaft.

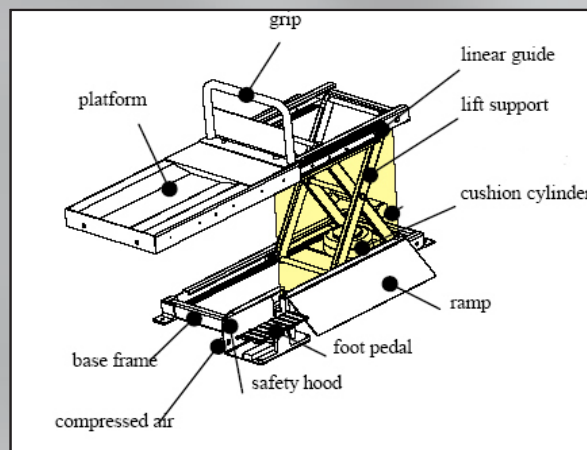

Avoids back strain lifting heavy wheels.

The wheel is always correctly clamped.

There is no force on the shaft or the wheel during the clamping process.

The Airgolift is operated by compressed air, no electrical connections required.

The Airgolift suits all models of Eagle SMF Wheel Balancers.

### Specs:

Max Lifting Height-	380mm
Max Horizontal Travel-	515mm
Max Lifting Weight-	70kg
Net Weight-	42kg
